# Operating Instructions

## PRECAUTIONS

### IMPORTANT INFORMATION, PLEASE READ CAREFULLY BEFORE USING THIS PRODUCT.

This product is intended to safely provide turn-by-turn instructions to get you to a desired destination. Please read the following precautions to ensure that you use this navigation system correctly.

- This product is not a substitute for your personal judgement. Any route suggestions made by this navigation system should never supersede any local traffic regulations or your personal judgement and/or knowledge of safe driving practises. Do not follow route suggestions if the navigation system instructs you to perform an unsafe or illegal manoeuvre, places you in an unsafe situation, or routes you into an area which you consider unsafe.
- Glance at the screen only when necessary and safe to do so. If prolonged viewing of the screen is necessary, stop in a safe and legal manner and location.
- Do not input destinations, change settings, or access any functions requiring a prolonged view of the monitor while you are driving. Stop in a safe and legal manner and location before attempting to access the system.
- When using the navigation system to find/route to an emergency service, please contact the facility to validate and verify availability, prior to driving to it. Not all locations of emergency service providers such as police and fire stations, hospitals, and clinics are contained in the database. Please use your own judgement and your ability to ask for directions in these situations.
- The map database used in the navigation system is the most recent map data available at the time of production. Because of changes in streets and neighbourhoods, there may be situations where the navigation system may not be able to route you to your desired destination. In these cases, use your own personal judgement.
- The map database is designed to provide you with route suggestions, it does not take account of the relative safety of a suggested route, or of factors which may affect the time required to reach your destination. The system does not reflect road closures or construction, road characteristics (i.e. type of road surface, slope or grade, weight or height restrictions, etc.), traffic congestion, weather conditions, or any other factors which may affect the safety or timing of your driving experience. Use your personal judgement if the navigation system is unable to provide you with an alternate route.
- There may be situations where the navigation system may display the vehicle's location erroneously. Use your own driving judgement in this situation, taking into account current driving conditions. Please be aware that in this situation, the navigation system should correct the vehicle's position automatically; however, there may be times where you may have to correct the position yourself. If this is the case, stop in a safe and legal manner and location before attempting operation.
- Make certain that the volume level of the unit is set to a level which still allows you to hear outside traffic and emergency vehicles. Driving while unable to hear outside sounds could cause an accident.
- Please ensure that any other person who intends to use the navigation system has read these instructions and follows them carefully. In addition please be aware that personal information (for example the navigation routes and destinations) will be stored within the stick and will be visible to any person with whom you share the stick. In order to avoid access to your personal information therein stored, please delete the data before the actual transfer. Finally please note that once the

information is deleted it cannot be restored.

If there is anything in the manual about the operation of the navigation system which you are uncertain about, please contact your local Alpine authorized navigation dealer before using the navigation system.

# Installing & Getting Started

## Names of Each Part

It describes the names and functions of the Alpine Stick.

## LED Color & Time

Depending on the state of the Alpine Stick, LED movements and colors change.

LED Color	Description
	When the Alpine Stick is attached (connected), the skyblue light blinks when recognized.
	After Alpine Stick recognition when ignition is on, the skyblue light is maintained.
	When an update begins, the LED flashes skyblue.
	When the Alpine Stick is installed on the PC and recognized, the orange light is maintained.

## Using the Home Screen

---

When connecting the Alpine Stick, it consists of the following:

If you want to move to the Alpine Stick screen while running another screen, press the Navigation icon.

**① iGO Navigation**

Move to the navigation screen.

**② Settings**

Move to the Alpine Stick-related setting screen.

# Initial Setting

Prior to using the Alpine Stick, initial setting inside the vehicle is necessary. Check the method below for setting.

## Mounting Alpine Stick & Running Navigation

- 1 Connect the Alpine Stick to the black USB port using the supplied extension cable.**
- 2 Once the Navigation icon is activated in the vehicle, press iGO Navigation.**

## Connecting a mobile phone (Android phone/iPhone)

- 1 After mounting the Alpine Stick, press Settings > Phone Connect.**

- 2 In the settings of the mobile phone, run a mobile hotspot and check the hotspot name and password.**

- 3** On the list of hotspots available for connection, choose the hotspot name and enter the password.

- 4** If the mobile hotspot is connected normally, the mobile hotspot connection icon appears on the top of the home screen.

# Environmental Setting

When using the Alpine Stick, you can set necessary functions or check system-related information.

## Setting Navigation App Automatic Launch

This will auto-start the navigation app once the Alpine Stick is mounted and the connection is established. The two-button launcher will not be shown.

On the Menus screen of the vehicle, set Settings > Navigation App Automatic Launch.

## Setting Automatic Launch

When the Alpine Stick is connected, two launcher screens will automatically appear.

On the Menus screen of the vehicle, set Settings > Automatic Launch.

## Setting LED Lighting

---

When mounting the Alpine Stick, you can activate or deactivate the LED lighting.  
On the Menu screen of the vehicle, set Settings > LED Lighting.

## Setting Language

---

You can set the language to be displayed on the Alpine Stick screen.

- 1** On the Menu screen of the vehicle, press Settings > Language.
- 2** Press the language you want to set.

## Setting Phone Connect

---

Connect the Alpine Stick with the mobile phone.

- 1 On the Menu screen of the vehicle, press Settings > Phone Connect.**
- 2 On the hotspot list, press the device to connect and then connect it.**
- 3 Once connected, 'Disconnect' is displayed, and the icon is displayed on top of the Menu screen.**

## Setting System Information

---

You can see the Alpine Stick information.

## Setting Reset

You can reset the use environmental setting of the Alpine Stick system.

## Caution

Among customers who are using Alpine Stick without using Hotspot for a long time and need navigation updates, a notification popup appears from two weeks prior to the expiration date.  
When the Internet is connected after pressing OK, updates are performed automatically.

When connecting Hotspot for use, the above popup does not appear.

### Important information on handling electrical and electronic equipment

Thank you for purchasing an Alpine brand product. To ensure that you can dispose of the device properly and in an environmentally friendly manner, we would like to draw your attention to the statutory provisions of the European Waste of Electrical and Electronic Equipment (WEEE) directive and its national implementations.

#### 1. Separate disposal

The WEEE directive and related national laws stipulate that electrical equipment must not be disposed of with household waste. Instead, it must be disposed of properly. Please hand in the device at a public collection point or your local recycling center. There it will be handled properly and recycled in an environmentally friendly manner.

#### 2. Labeling

Electrical appliances are marked with a symbol (crossed-out dustbin on wheels) indicating that the appliance must not be disposed of with household waste.

#### 3. Data erasure

Before disposing of the electrical device, you must ensure that all personal data stored on the device has been deleted. To do this, you can reset the device to the factory settings or delete the data manually.

#### 4. Return and collection systems

You also have the option of returning the electrical device free of charge to municipal collection points, recycling centers or retailers. There, the device will be properly handled and recycled.

We hope that you are satisfied with your electrical product and that it will serve you well. If you have any further questions, please do not hesitate to contact us or one of our local distributors.
