### The Alpine Adventure Audio - Sound Experience

The new series of Alpine Adventure Audio sound solutions for the Fiat Ducato 8/9 have arrived - with the listening and mobility styles of motorhome and camping van enthusiasts in mind. Specially engineered for the challenging, and often audio-unfriendly environments of these camping and utility vehicles, our systems are guaranteed to provide unmatched sonic excellence on those long drives to your destination. They are not only a joy to listen to, but also a breeze to install, and their distinctive design will spruce up any cockpit without spoiling the original cabin cosmetics. Make your road-trips as exhilarating as your activities upon arrival with an Alpine Adventure Audio system!

### Designed for Fiat Ducato 8/9

The SWC-D84DU is designed to overcome the audio limitations of the Fiat Ducato 8/9's cabin. The vehicle's doors have no internal sound-proofing, resulting in strong vibration noise of the inner door pane. By adding this woofer to the center console, you can enjoy much deeper and cleaner bass and overcome the mentioned issues from the ground up.

\* Compatible for vehicles with ISO connection in the radio slot. If you own a liner motorhome, please check compatibility before purchase. Only compatible with vehicles with original cup-holder. The cup-holder can be retro-fitted using original manufacturer parts.
