## ZXM Mini Amplifiers

Our R&D team has been working long and hard to release the ZXM series amplifiers into the world market. These amplifiers are made to be as small as possible without compromising sound quality, power and functions. ZXM5004 is a 4 channel amplifier with total power 500W RMS. This equals to 4x80W RMS in 4 Ohm but the amplifier is stable into 2Ohm and then delivers 4x125W RMS. The 4channels can also be bridged into 2x250W RMS in 4Ohm. The amplifier comes with adjustable HP/ LP filters and also a switch to use 2ch input or 4h input low or high level. A lot work has gone into making these amps with low EMI emissions to not interfere in advanced electronics or FM signal.

Part number	Description	Ma.crt		RRP £
ZXM7005	5ch Mini-Amp 2Ohm stable 4x60W RMS 4Ohm + 350W at @ 2Ohm	10		249,99
ZXM5004	4ch Mini-Amp 2 Ohm stable 4x80W RMS 4Ohm	10		199,99
ZXM6003	3ch Mini-Amp 2x75W4Ohm + 350W RMS Output @ 2Ohm	10		199,99
ZXM5001	Mono Mini-Amp 1 Ohm stable 500W RMS 1Ohm	10		169,99

ZXMSC5	Speaker cable 5m for ZXM amplifier	1		24,99
ZXMSS3	Subwoofer Speaker Cable 3M for ZXM5 & 3	1		25,99

## ZXT Subwoofers

Ultra flat woofers with a glass fibre cone and ultra strong magnets to give ultimate performance in a shallow format

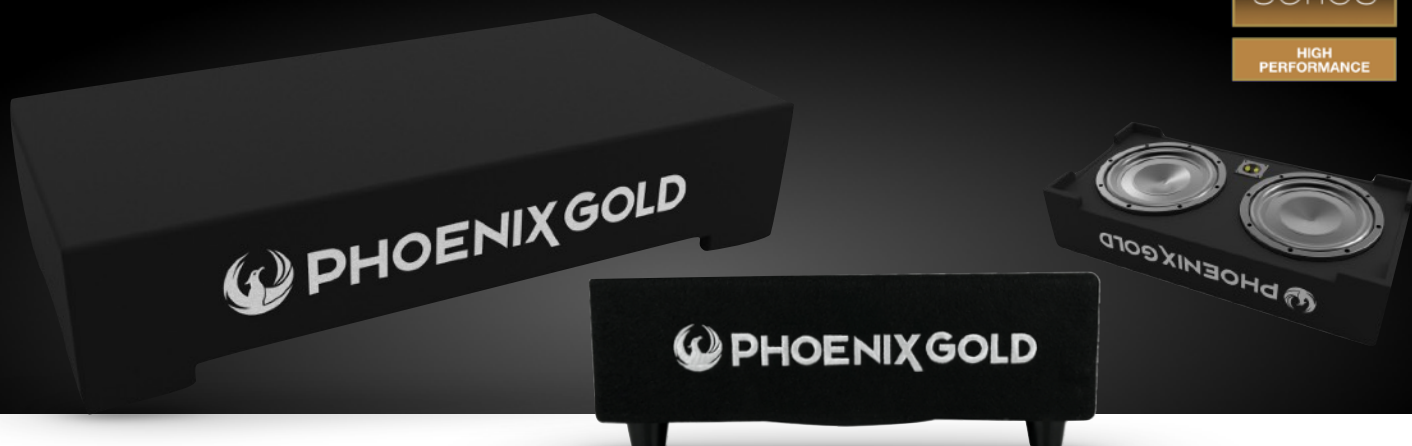

Part number	Description	Ma.crt		RRP £
ZXT8D2	8" Slim subwoofer 250W 2x20hm	6		129,99
ZXT10D4	10" Slim subwoofer 350W 2x40hm	6		149,99
ZXT12D2	12" Slim subwoofer 500W 2x20hm	6		169,99

## ZXT Passive Radiator

Part number	Description	Ma.crt		RRP £
ZXT8PR	8" Passive radiator	24		42,99
ZXT10PR	10" Passive radiator	12		69,99
ZXT12PR	12" Passive radiator	12		84,99

## ZX SLIM SUB

The new PBS boxes is made with maximum sub performance in a small format. This is not a easy task so we used some really going back to basics tricks to reach the performance goals. The boxes have two subs but one of them are a passive radiator. The radiator makes the difference with helping to extend the lower bass frequencies and help the normal sub perform much better in the closed box. We also made it down firing to make use of the extra gain you get with this kind of "corner" loading. So in short small box with loads of real low subwoofer performance that is missing in todays cars!

Part number	Description	Ma.crt		RRP £
ZX18PDF	8" Passive Box Mini 20hm 250W RMS	1		159,99
ZX28PBS	8" Passive dual box 250 W RMS 40hm passive radiator box down firing	1		249,99
ZX210PBS	10"Passive dual box 350W RMS 20hm passive radiator box down firing	1		299,99
ZX212PBS	12" Passive dual box 500W RMS 2x20hm coils passive radiator box down firing	1		349,99

## ZX Slim subwoofer

200 W RMS Slim subwoofer complete with slim grill for minimum space

The compact ZX18PBS is less than 13cm deep, with the grille and therefore slides easily into a car boot. And its size isn't the only great feature: it is also easy to use and delivers quality sound performance thanks to its 8" subwoofer that has 400 watts of max power.

The box is delivered with brackets, screws and L & Z brakes to be able to mount it in many different ways including making it a down firing sub ZX18PBS can be fixed in various locations in your vehicle and it perfectly completes a 2 or 3-way audio system while remaining discreet and delivering precise and dynamic. The perfect stealth box !

## ZQ9004

The ZQ9004 has a Dual-Power system with an excellent PCBA designed to optimise a clean and efficient power supply to feed the final stage of the amp. This top of the range audio set-up has been developed as a highly exclusive and valuable specialist audio electronics product. Phoenix Gold are constantly endeavouring to meet the growing demands of audio enthusiasts around the world to let them feel the ultimate sound experience. Passive components such as capacitors, for example, may not be at the centre of attention when compared to active components, but they still form an indispensable part of the overall result. This is the key to making a really unique amplifier with a fantastic performance.

Two layer PCB with immersion gold treatment! Original PG technology!

Dual power supply

24k Gold plated terminals

Nichicon (Japan) capacitors

Wima (Germany) capacitors

Toshiba & ON Transistors

German manufactured shielded transformer cores

No filters, no boost, no EQ...nothing in the way...

High end polymer gain potentiometers

S/N Ratio above 110dB

All amps have 2 engraved logos on the side with serial number on one of them

**"Electroless nickel immersion gold (ENIG or ENi/IAu), also known as immersion gold (Au), chemical Ni/Au or soft gold, is a metal plating process used in the manufacture of printed circuit boards (PCBs), to avoid oxidation and improve the solder-ability of copper contacts and plated through-holes"**

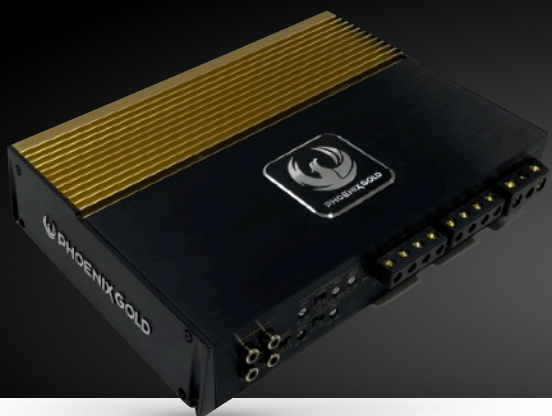

Part number	Description	Ma.crt		RRP £
ZQ9004	SQ 4x150W RMS 4 Ohm Class A/B	2		999,99

## ZQ5004

4channel amplifier with loads of technology from the reference amplifier ZQ9004. The ZQ5004 is HiFi performance amplifier with very high end components both in preamp and output section. The ZQ5004 have more features to make installs easier with 2ch or 4ch input mode and also HP/LP. The amp is full bridgeable to deliver loads of output power.

## ZQ15001

Mono amplifier with loads of technology from the reference amplifier ZQ15001. This amp are might be class D but it's made for HiFi performance The ZQ15001 uses the very best components both in preamp and output section. The ZQ15001 have loads of features like LP filter, Phase control, Subsonic filter and remote gain controller. The amp has a very special tuning to reproduce the Audio in lower regions with massive power and dynamics.

Part number	Description	Ma.crt		RRP £
ZQ5004	SQ 4x85W RMS 4 Ohm Class A/B	2		429,99
ZQ15001	SQ Mono block 1500w 1 Ohm Class D	2		499,99

## ZQA6.8 - DSP Amp High End Amplifier

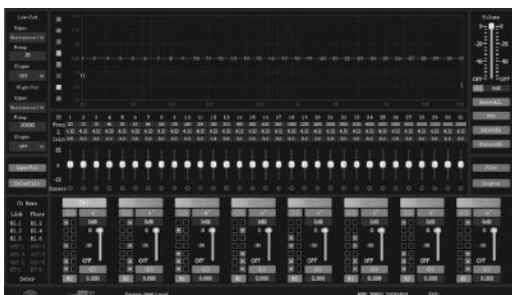

Two layer PCB with immersion gold treatment! Original PG technology!  
 DSP Chip ADAU1452 - input/output up to a sample rate of 192 kHz  
 139 dB DNR  
 JRC5532 OP Amps (Japan Radio Semiconductor)  
 24k Gold plated terminals  
 Elna & Nichicon (Japan) capacitors  
 Wima (Germany) capacitors  
 Toshiba Transistors  
 German manufactured transformer cores

ZQA6.8	SQ 6ch Amplifier with 8ch DSP and BT Class A/B	2		769,99

## ZQDSP12

AUDIOPHILE 12 Channel DSP with OEM integration capability. This masterpiece is designed by the PhoenixGold design engineering team to bring something very unique to market at a competition grade audio level. The unit features the best in class DSP components. The DSP has Digital and analog inputs and 12ch Output. The ZQDSP12 also has 10ch high-level input with autostart function. It also has Bluetooth 5.0 for music streaming. The DSP can also handle FLAC material through the built-in player that can be controlled through the wireless remote (not included)

### ZQDSP12 - Designed by Phoenix gold engineering team

- 10 ch High Level Input & Two Ch Low Level Input & 12 Low Level Output
- Coaxial Input, Optical Input, USB playback
- Windows interface
- IR controller (volume, music source) (Optional, wireless (not included))
- LCD controller (Volume, Music, Source, Optional (not included))
- BT5.0 support Music Stream In
- High end components bring excellent sound performance
- Multiple Input easy to match most head-unit
- Excellent PC interface easy to finish setup
- USB Playing supporter FLAC, MWA etc high quality music
- IR (wireless) controller let people easy to select music and control volume (not included)
- Beautiful cosmetic designing
- BT5.0 support high quality music stream in
- 12 Ch output, suitable kinds of car audio requirement

Part number	Description	Ma.crt	RRP £
ZQDSP12	12Channel SQ DSP, Digital input, 10xHigh Level & BT5.0	4	699,99

### ZQDCT - ZQ Controller

The ZQ Controller is the optimal controller for your Phoenix Gold ZQ DSP amplifier or DSP. The unit is built with the best components on the market with a high resolution LCD screen to display the information in the best possible way. The unit has a rotary controller to control the volume. It also has push controller to play or pause music. On the unit also has source select and forward and backward of tracks. The controller also controls the built media player that can play high res audio files and also the bluetooth controls.

### ZQWCT - ZQ wireless Controller

The ZQ wireless Controller is perfect solution to control the main functions of the Phoenix Gold ZQ DSP amplifier or DSP. Control the volume, play, pause music. On the unit also has source select and forward and backward of tracks. The controller also controls the built media player that can play high res audio files and also the bluetooth controls.

## Power-up kits - Plug & Play

These kits is all in one box solution that plugs into different vehicles and give the car a real power upgrade. But the power is just a small part of the upgrade! When plugging in the DSP amplifier you also get a completely new soundstage tailored to the specific vehicle. The tuning is done by PhoenixGold's audio team with great experience of tuning cars. So you get a real audio expert sound in the car. These kits suits both the original speakers and also PhoenixGolds ZD OEM speakers. We give all the presets you need for the different variants and also the option to add an additional subwoofer.

The NEW ZP Series amps with powerful Full bridge technology. These amps are not you normal Mono amps in "Brazil" style. These are made to last and perform under the most tough conditions. The amps have high quality components and connections including high performance potentiometers. The design has been refined under a long period of testing and evaluating where things can go wrong. That's why we are late to the party but we would not be satisfied with a product that are not up to very standards of Amplifier designs. The ZP line are monsters that will take your speakers to the limit of performance and they will do so for a long time!

All the amps are 1 Ohm Stable and are full range so you can use them on subs as well as full range speakers. ZP series come with full filters both High Pass and Low Pass. We also added a boost function that you can select the centre frequency between 35-100Hz up to 18dB. All of the amps have remote gain controller included in the box. What they don't have: There is no internal fuse, all of these amps needs to be fused on power cable, they don't have high level input or autostart... these are PURE amplifiers made for Maximum power delivery

ZP80001	8000W 1 Ohm Fullrange Mono Amp	2		499,99

The NEW ZP Subwoofers have been engineered to offer optimum levels of SPL while maintaining a wonderful sound reproduction and fantastic level of sound quality.

We have used precision designed soft parts such as our OFC Voice coil and woven tinsel leads for optimism power handling, a non pressed paper cone for the best dampening, triple polycotton spiders for accurate movement and a tall but perfectly proportioned surround to give the optimised amount of linear excursion to cone area to deliver the most amount of bass possible.

To drive the engineered soft parts a double stacked ferrite magnet with a accurately calculated pole piece gap for the higher gauss possible within the parameters of the subwoofer, this allows the woofer to be driven with excellent power and exquisite precision.
