8 Note Cabrio Comfort Module

Important note regarding the Cabrio Comfort Module

- The module doesn't include an automatic anti-trap protection. That means that the user has to pay close attention during the closing process in order to prevent that any objects or people (in particular children) are in the area of the closing zones of the folding top during that time. Therefore, it is essential that the user keeps the whole closing process under surveillance. If people come close to the folding top, the closing process can be stopped immediately by pressing the remote control as well as the button of the folding top in the interior. The Kufatec GmbH & Co. KG assumes no liability for damages that occur due to disregarding these safety regulations.
