Allows for the addition of an aftermarket reverse camera to the original vehicle screen. This harness works with vehicles that feature Audio20/Command radios.

Note: the camera being paired with this product must be NTSC. Ensure rear view camera functionality is activate prior to installation. For activation, see your nearest Mercedes-Benz dealership/service centre.

DISCLAIMER:

Prior to Installation

Read the manual prior to installation. Technical knowledge is necessary for installation. The place of installation must be free of moisture and away from heat sources. Please ensure you use the correct tools to avoid damage to the vehicle or product.

Connects2 can not be held responsible for the installation of this product.

Technical Support

Connects2 want to provide a fast and suitable resolution should you encounter any technical issues. With this in mind, when contacting Connects2, try to provide as much Information as possible. This will speed up the process and help us to help you.

Please use our dedicated online technical support centre: support.connects2.com

- Reverse Camera Add On Adapter
- Instructions

INSTALLATION

1. Remove the vehicles head unit by following the manufacturer's instructions/ guidelines. Once removed, disconnect all the power connections.
2. Install the reverse camera that you are going to pair with the CAM-MB12-AD, and proceed to connect the camera's RCA connector to the female RCA of the CAM-MB12-AD.
3. Take the blue Fakra connector of the CAM-MB12-AD and connect this to the back of the head unit into the green camera connection socket (see below for image reference).
4. When done, connect the power and test the reverse camera's functionality before reassembling the dashboard.
